Good Afternoon Mr. Locke,

We are a group of students at Wentworth Institute of Technology working on a short documentary about police violence for a class in Video Production. Our professor told us about your blog and recent experience. Would you be willing to discuss the events of that day on camera? If so, would you have time in the next few days? We could meet at your convenience.

Regards,

Kristen Carroll

Dear Ms. Carroll,

Thank you for your generous invitation. I have written about the incident at length on my blog and that is all I really want to say about it. I certainly don't want to retell/relive such a traumatic experience on video, especially since recordings have a way of migrating in these times. To whatever extent possible for me to control, I would prefer to be known for my work as an artist and educator and not for my dumb luck in not being killed in an frightening act of misunderstanding.

Thank you, both for contacting me and for understanding.

Steve
